

Compliant recycling solutions for end-of-life electronics

Background

Electronic waste is one of the fastest growing waste streams globally. This has been spurred by increasing technological advances that drive the development of new products and the replacement of outdated equipment. The outdated equipment may contain toxic or hazardous materials, such as cadmium, lead, or mercury which can contaminate the environment if disposed of improperly.

Why recycle

Heavy metals in electronic equipment may cause the equipment to be considered a hazardous waste. Under Subtitle C of the Federal Resource Conservation and Recovery Act (RCRA), hazardous waste must be properly identified, stored, transported, treated and disposed of. A waste generator is

responsible for proper disposal of its hazardous waste and for cleaning up the effects of improper disposal. Recycling reduces the potential for future liability.

The Veolia solution

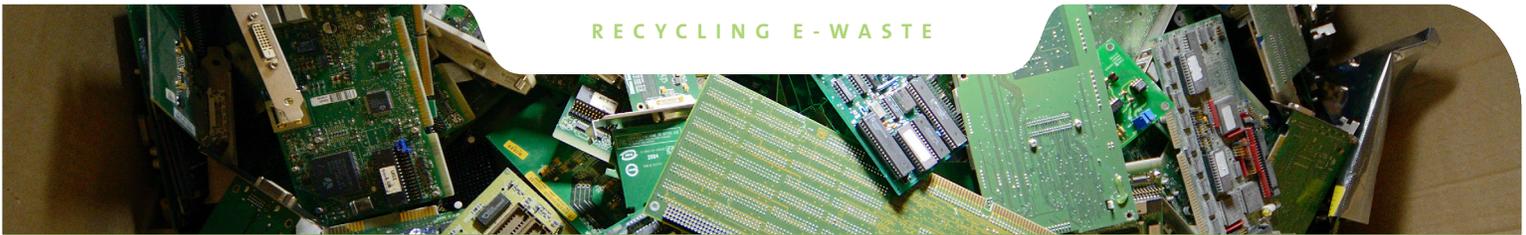

We provide our customers everything from de-manufacturing and recycling to asset management, data destruction and metals recycling in order to convert waste into useable products, thus eliminating potential liability in the future.

Customized service

Our knowledgeable representatives understand e-waste and are ready to tailor a recycling solution to fit your needs, ranging from complete destruction and recovery of metals, plastics and glass, to maximizing the reuse and resale of intact components.

We recycle the following variety of computer and electronic materials:

- Monitors/cathode ray tubes (CRTs)
- Flat screens
- Personal and handheld computers
- Components and peripherals
- Printers fax machines and copiers
- Mainframes and servers
- Consumer electronics
- Cell phones
- Telephone systems
- Medical and office equipment
- Generators, wire and motors
- Panelboard
- Servers
- Cabling

Complete range of services

We offer our clients a variety of services designed to fit their needs. We can manage your computer assets, provide data security, de-manufacture, recycle and reuse/resell various equipment in order to offer the most cost-effective service options available.

Packaging & transportation

We provide you with a variety of boxes and containers to store and ship your e-waste. We also provide coast-to-coast transportation utilizing our unmatched fleet of semi-trailers, box vans and approved third-party transporters to ship your waste to one of our four fully-permitted recycling facilities.

On-time pick up

When we promise a pick up, we adhere to that promise. Once arrangements are made, you can count on us to be there on time.

Audited and approved downstream vendors

Veolia has achieved certification to the Responsible Recycling®: 2013 (R2) Program for electronics recyclers. As part of the R2 certifications process, Veolia must exercise due diligence in ensuring that downstream recyclers and processors manage recycled materials appropriately, throughout the downstream recycling chain.

Why Veolia?

Environmental compliance

We maintain an excellent record of compliance with regulations governing health and safety and the environment. We follow procedures meticulously with our on-site teams, and continue to focus on the details throughout transportation, treatment and disposal.

Financial strength

Veolia is the international leader in providing environmental services for waste, water, and energy. With over \$25 billion in revenue, it is the largest environmental services company in the world.

Technical expertise

Our account, project and technical representatives understand hazardous and nonhazardous waste and the related regulatory requirements. Over 2,500 Veolia employees are ready to assist you in any way - from providing information about government regulations and answering technical questions regarding treatment alternatives, to training your employees and setting up disposal programs that save you time and money.

About us

From onsite pick-up to final treatment or disposal, Veolia North America's Environmental Solutions and Services group assures safety, environmental responsibility and regulatory compliance by channeling hazardous waste through our network of over 400 company-owned or certified service centers nationwide. These service centers include treatment, recovery and disposal facilities, sales offices and transportation locations.

Key facts

- 2,500 employees
- 400+ company owned or certified service centers
- 39 10-day in-transit facilities
- 14 permitted TSDFs
- 13 OSHA VPP and/or ISO certified facilities

Waste managed

- Lamps and ballast
- Batteries
- E-waste
- Mercury waste
- PCB & non-PCB electrical equipment
- Specialty medical devices and diagnostic equipment
- Medical waste sharps
- Tritium exit signs
- Aerosol cans
- Smoke detectors
- Pharmaceutical waste
- Damaged, defective or recalled lithium batteries
- Pharmaceutical waste
