Medical Electronics Recycling Boxes (Applies to Supply-480, Supply-481 & Supply-482)

Required Safety Supplies:

Medical electronic equipment is typically classified as an article under the OSHA regulations; however, most manufacturers will provide a Safety Data Sheet (SDS) for the equipment they manufacturer. The user should review the SDS for any required and recommended safety precautions for handling the equipment.

AUTHORIZED CONTENTS: - The RECYCLEPAK® Medical Electronics Recycling Boxes are designed for intact electronics, diagnostic components and peripherals ONLY. Please follow the guidance below as to the types of electronics allowed in your RECYCLEPAK® box. Step #1 – Decontamination of Medical Equipment and Certification

1. The medical equipment must be decontaminated to ensure it does not contain any “regulated waste”. The Bloodborne Pathogens standard, 29 CFR 1910.1030 uses the term, "regulated waste," to refer to the following categories of waste which require special handling: (1) liquid or semi-liquid blood or OPIM; (2) items contaminated with blood or OPIM and which would release these substances in a liquid or semi-liquid state if compressed; (3) items that are caked with dried blood or OPIM and are capable of releasing these materials during handling; (4) contaminated sharps; and (5) pathological and microbiological wastes containing blood or OPIM. The used medical equipment must be decontaminated, to ensure it would not be classified as an infectious material by the US DOT under 49 CFR 173.134(a)(8).
2. Locate the enclosed “Electronics Recycling Box Certification Sheet”
3. Completely fill out the Generator (Shipper) Information, review the requirements, and then certify the electronics being packaged in the RECYCLEPAK® container meet the requirements.

If a prepaid return shipping label was not included with your container, please contact customer service at 1-888-669-9725 to obtain a replacement.
